[NAAC Accredited Grade A+].

## PG students from the specialization of Extension and Communication from the Institute of Home Science on different field surveys

**Field Surveys:** Field surveys are a method of collecting data by physically visiting a specific location or area. They are used to collect data about the property on which a construction project will take place, and or the existing features of a building. This data includes the property's boundaries, contours, existing features, and utilities. The surveyor who conducts the field survey uses this data to produce a map of the property. Field surveys are also used by researchers and master students for the process of primary data collection

On 13<sup>th</sup> September 2023 a group of students from Extension and Communication conducted a field survey to ICDS Centre namely Khaki Mohalla, Habbak. The aim of the visit was to check the services and facilities provided by the Anganwadi Centre.

On 30<sup>th</sup> August 2023 a group of students from the specialization of Extension and Communication went for a field Survey to Shining Star Boutique Lawaypora Srinagar. The Objective was to know in details about the non-government agencies working for the services of women, health, nutritional education.

On 30<sup>th</sup> August 2023 a group of students from Extension and Communication went for a field survey to Chottay Taray foundation, Bemina. The objective was to collect information about the services provided to specially-abled children.
